## REUSE

Can the product be reused, perhaps in a new way, to extend its life?

Can parts be reused?

Is it easy to dismantle for reuse?

## REFUSE

Can you refuse to design something that isn't really needed?

Can you refuse to use materials that aren't recyclable?

If your design isn't sustainable, will people refuse to buy it?

## RECYCLE

Can you use recycled materials?

Can you use materials that can be recycled after use?

Can you design a product that is easy to recycle?

# The 6Rs

Use the Six Rs to make your own designs sustainable and to evaluate the environmental impact of other products.

## REPAIR

Can the product be repaired easily?

Can it be repaired cheaply?

Can parts be replaced, rather than the whole product becoming unusable?

## REDUCE

Can you reduce the amount of materials used?

Can you reduce the energy needed for manufacturing?

Can you reduce the waste and packaging?

## RETHINK

Is this product really needed?

Can you rethink the product so it lasts longer?

Can you redesign the product so it's easier to recycle?

# Drop Off Recycling Centers
